## Lake Erie Systems Announcement

March 16, 2020

Dear Valued Partner,

This is an update on how Lake Erie Systems is responding to the coronavirus (COVID-19).

*First of all, our initial concerns are for those impacted by COVID-19 and their families, as well as those treating the affected, and those working to contain the virus from spreading.*

As the situation continues to unfold, we are committed to our employee and family health and safety, and that of our customers. For our working team, we are adhering to recommendations from local, national and global health organizations to ensure all preventive measures are taken to avoid spread of the virus.

At the same time, we are taking steps to maintain our supply chain and meeting our customer needs. So far, there is minimal disruption to our supply chain, and we are currently adequately staffed to service those needs

We will continue to evolve along with the rapidly changing situation. We are developing contingency plans to ensure safe and effective operations. The safety of our employees and customers is top priority, and we are committed to working together to solve challenges that may arise.

Please join us in weathering this challenging situation together. Our families. Our communities. Our country. Our WORLD.

Sincerely,

Dennis Dolan, President, and our entire team at Lake Erie Systems
