**High Definition (HD) Color printing technology** – For print quality that visibly enhances your documents, the C3600n renders deeper, more saturated colors, finer detail, and more precise toner placement than ordinary color printers.

This unique four-part process delivers fast, high-quality printing with breathtaking output. It combines four technologies from OKI Printing Solutions:

1. **Multilevel LED printheads:** systematically control the amount of toner applied to each dot—increasing the color intensity.
2. **Microfine toner:** the large color gamut and pigment density of OKI<sup>®</sup> color toner ensures that printed documents are sharp, crisp and glossy.
3. **Single Pass Color<sup>™</sup>:** the paper media follow a streamlined path, passing beneath four in-line printheads. Simple, effective, fast.
4. **Printer control system:** software and firmware that provide automatic adjustments and alignments for optimum print quality every time.

Along with 1200 x 600 dpi resolution, the HD Color printing technology of the C3600n Digital Color printer provides greater depth of detail and color, and a high gloss finish, even on ordinary office paper.
